Hand Made Coasters,Recycled Materials.

Coasters made from pallets,i was busy at the weekend,trying to make the most of the good weather.

I have had some projects in mind and one of them was coasters.

Rounded Corners and smooth,awaiting the personal touch of creativity and colour.
Or just leave it natural looking.

Rustic patterns with history.

Coaster Holder easy to store.

i love the rustic and Natural look.

I have seen on youtube many coasters in the form of mini pallets that look like coasters and very neat they are.

I wanted to make something that was rustic with a beach feel to it and possibly suit a man cave as well and at the same time suit just about eveyones taste,and pleasing on the eye.

I did intend to do just the coasters,but i thought they looked lonely.

I am pleased with the look,feel of them,and when placed and used on the table they become part of the furniture.

Their will be more projects on the way,so keep checking back for updates.
