### **Handmade,Heart,Door Wedges**

Handmade,i enjoy getting my hands on some wood,anything from pallets to pine or Offcuts.

Been busy this week creating a nice Pine Heart as a decorative piece and a pair of door wedges which are handy,and made from Canadian Pine.

### **Pine Heart.**

i left the Heart as Natural,you can see all the detail.

The Heart can be versatile,the stand you see the heart in,is one of my recent projects i did for use as a Tablet stand or Mobile Phone Stand and is is allso versatile and functional.

I can think of many ways,for future projects and one of them is a nice chunky Heart Chopping board which would be alot thicker and finished with some Danish oil to help protect it.

## Canadian Pine Door Wedges.

Beautiful Lines,Colour and Curves.

I love the Wood Texture and colour,which shows off the lines and indentations.

You don't have to use Door wedges to prop doors open,you could use them as a decorative piece,or maybe a paper weight.

I have many more ideas regarding Door Wedges,but thats for the future.

Canadine Pine shown here with more light displayed on the door wedges,shows of that lovely colour and detail.

I am at the moment busy doing more projects,i will keep you in suspense,i will upload either by the end of the day or Tomorrow,some thing relaxing is the key word.

Stay Tuned,enjoy.
