## Felt and Weaving Tools.Projects

Posted by [Nigel](#) Sun, November 20, 2016 16:28:39

### **Felt and Weaving Tools.**

Art and Craft,many people including myself have turned to developing our own skills in crafting.

We get so much satisfaction in being creative.

I have done a few projects this year and recently i have been creating a Wooden Mobile Phone Case.

It is still in progress,so while the glue was still setting and drying,i thought i would turn my hands to Crafting in a different way.

I love everything about art and craft,the beginning,when you have something which really looks like it can't be anything else,then you start working a bit of creativity,and yeh,you have something.

I have been making other projects,one minute i'm out in the shed when its dry,and the next minute i'm in the house doing something with fabric,so their are many more projects to come,you can see why i do something else at the time,because of the project restricting in it's process.

### **The Tools.**

#### **Felt Needle,Hand Made.**

So i decided to make some Felt and Weaving tools.

The first one is a Small Felt needle,size in Length is 2.5 inches,and the thickness is the size and thickness of about 3 -4 tooth picks.

Very easy to use and grab hold of, and recycled from a pallet.

They can be made from other material, but I'm trying to keep costs down.

The felt needle is ideal for attaching your yarn, string or material you use and tie around the notch and proceed, the needle point is ideal for inserting in and out of prepared slots, holes, that have been created with a bawl or similar tool.

### **Weaving Tool, Hand Made.**

My next tool is a weaving tool, I have seen people on YouTube creating looms, and made from a small cardboard with string, with a step by step guide, so I have created a handy Weaving tool made from pallet also, the size of the tool is just over 4 inches in length, and 0.5 inch wide (half an inch)

I hope you enjoy seeing the projects, stay tuned for more soon. Pictures coming soon
