Upcycled from Pallet.

Hows this for storage,you can put this anywhere.

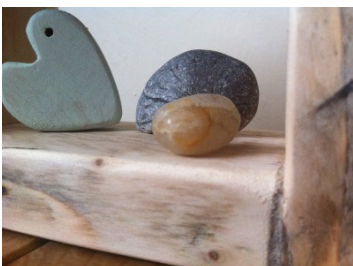

On your desk for storage.

Use as Nature Display.

You could use it for your shed with it being unusual and a one off.

Decorative beauty piece and Rustic made from Pallets.

Grrr Rustic and Grrr.

I left some of the indentations and marks on it,and some nails all pounded to a smooth finish,also the corners and whole piece is smooth,and rounded off.

It is unusual and the reason i made it was because i like to make something out of nothing.

I like it because of the patterns and shapes and colours after sanding.

More designs projects and ideas will be uploaded soon.

For more go to the web address below.

Upcycled from a Pallet.

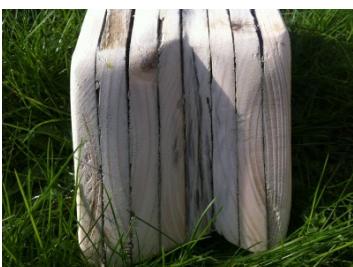

You could use it for a Rabbit Accessorie,bridge maybe.

I like to make the most of what timber i have,and try and make something functional.

I had some pallet pieces chopped up and came up with something either as a heavy duty Gate Wedge or a Pet accessorie,such as a Ramp/Bridge for in the Garden.

It is very Rustic with you guessed it,Rounded off edges.

I have left it Natural looking,i am thinking about finishing it off with Danish Oil to water proof it and help it last in Rainy Weathers and Storms.

Yep Storm proof is what i'm thinking.

And below is another use,Heavy Duty Gate Wedge.

It has got me thinking about more pet accessories,not just Rustic one's but i will also make some fine polished and smooth accessories.

Here is a question,what you use it for.

To see more of my projects and ideas please visit my webpage.

More Pallet ides coming soon.
